

Shaping the future

Specialists in GRP Moulding Hand Lay up, RTM,
Light RTM, GRP Pultrusions and GRP Tooling

GRP Moulders and Fabrications

GRP Pultruded Profile and GRP Grating suppliers

The Main Sectors we operate in include:

- WATER
- DEFENCE
- CONSTRUCTION
- AUTOMOTIVE
- POWER AND ELECTRICAL
- RETAIL APPLIANCE

GFP Engineering Limited is a Privately Owned, Family run Company founded in 1968, engaged in the manufacture of Composite Plastic Components and Products. Our GRP moulding systems utilise the latest capabilities in Hand Lay, RTM (Resin Transfer Moulding), Light RTM (LRTM), Vacuum Assisted RTM (VRTM) and Cold Moulding Technology. GRP Moulding and GRP Fabrication is utilised with the end use in mind and this adds to the quality and durability of each product manufactured. We also specialise in GRP Grating, GRP Profiles and GRP Tooling.

With over 40 years and a wide range of experience we are able to undertake prototype, batch and long run production quantities, including all pattern and tooling work. An innovative approach means that the range of GFP Engineering's Products and Components is constantly developing, built on the foundation of long experience and expertise.

Using a skilled workforce operating to ISO9001 standards, we ensure our products are manufactured to the highest quality and efficiency and our computer production control system enables us to deliver on time to your specific requirements. Along with the utilising the latest in C.A.D design facility, we aim to provide a complete package from product inception through to delivery and life-cycle support. GFP's customer base includes main contractors for the Ministry of Defence, together with Construction, Water, Electrical, Automotive, Retail Appliance, General Engineering Companies, Public Authorities and Architects.
