

GRP KIOSKS AND HOUSINGS

GFP are bespoke GRP / Fibreglass moulders of Kiosks, Cabinets and Housings for the Water Treatment and Construction industries. We are adept at designing strictly to ISO 9001 standards and working closely with clients in designing and manufacturing the ideal solution for any requirement.

Our products include GRP Kiosks which GFP can supply a range of GRP cabinets and GRP kiosks from existing moulds using handlay moulding techniques or we specialise in fabricating 'non-standard' sizes for requirements which need a contract specific solution. GFP are adept at transferring customer requirements into CAD drawings for all aspects of GRP cabinets / GRP enclosures, and supplying to them directly to site. Our GRP cabinets are designed to withstand prolonged UV exposure and weathering with a high grade external Gelcoat finish. They are ideal for

electrical distribution control cabinets for roadsides and pipe / valve cabinets for water treatment works.

The features of GRP cabinets include: Stainless Steel Hinges – Smooth or Textured Finish – Night latch locking with KABA type barrel – Fire resistance up to class 0 – Foam Insulation core for frost protection – Any BS or Colour match – UV Stable.

Our GRP pump covers are designed and manufactured in house and supplied with a smooth external UV stable gelcoat finish to any BS or RAL colour. They can be any size and designed as split covers or single covers with external or internal flange joints. Cut outs for inlet or outlet pipework or cabling can be catered for and sealed if necessary. Stainless steel fixings can be supplied to fix to any structure and louvered vents, fixing catches and handles are optional extras. Insulation for frost and weathering protection are available in the form of PU foam sheet.

If you would like any further information about our range of GRP enclosures, then please contact us by phone or email as shown below.
